Mr. Wilson Barber
Manager, Real Properties
Eastern Navajo Agency
Bureau of Indian Affairs
Crown Point, New Mexico 87313

Dear Mr. Barber:

In reference to today's telephone call; I would like to reiterate the access situation to my AEC Mineral Lease in Section 13, Township 13N, Range 11W.

As advised, I have now made arrangements with the surface owner of Section 19, T 13, R 10, to gain access across his land to the NW corner of Section 19. This access puts the road catty-corner from the AEC Lease in Section 13. The gate will be between Section 19, and 24 just as close to the NW corner of 19 as is practical. This will result in the need to cross a very small portion of the NE corner of Section 24. In fact it will be possible to continue the road to Section 13 by only crossing a small triangle approximately 20' on each side in the immediate NE corner of Section 24.

I hereby formally apply for the surface access right to the aforementioned triangle in the extreme NE corner of Section 24. I am enclosing a map of the area with the proposed access road across Section 19 marked in dashed red pencil and the portion required in Section 24 marked in solid red pencil.

I appreciate very much your cooperation in this matter and hope we can clear up the access question as quickly as possible because the AEC informs me that my prospecting plan has been approved and will be mailed shortly. Again many thanks for your help.

Very truly yours,

G. Warnock
